What is ClearEnd?

ClearEnd is a new way for businesses to secure low cost voice and data **connectivity**, dependable ongoing **IT support** and knowledgeable infrastructure **project services** from a single source. ClearEnd was created by a team of communication and technology experts as a way for both tenants and landlords to benefit from the most reliable and cost-effective solutions available. ClearEnd is the single source that provides everything for the desktop and connectivity to the world.

By combining these services in a single package, ClearEnd provides a way for businesses to better manage their entire

communications and technology infrastructure – from sourcing and installing their phone system and Internet service, to expanding their internal local area network, to backing up their data, to optimizing the entire communications and technology system in the most efficient manner possible. ClearEnd helps businesses lower operating costs, while increasing service. No other provider can deliver ClearEnd's combination of service, support and savings – creating value for your building and your tenants.

How Do Tenants Benefit?

Tenants benefit from unique, low cost services that are the result of a mutually exclusive partnership between ClearEnd LLC and CS Technology, a NY-based technology strategy and implementation firm that provides services to tenants within some of Manhattan's largest buildings, as well as Fortune 500 clients such as **Bank of America, Bear Stearns, Deutsche Bank, Fannie Mae, Microsoft** and **JP Morgan**.

Key tenant benefits include a single point of access to:

- > Reduced operational costs through the lowest cost voice and data **connectivity** services
- > Industry-leading **IT support** services from dependable in-building IT professionals
- > Knowledgeable **project services** as needed, such as disaster recovery and business continuity planning

In addition, CS Technology's role as your

Building Technology Consultant means they are on-site and available when tenants need them – 24/7 support unavailable from anywhere else.

What Are The Savings?

ClearEnd can lower the amount your tenants pay for their voice and data communication services today by up to **50%**, while also providing them with the same IT support and services that large organizations benefit from – on a transactional basis. This savings is a tremendous value add for tenants when selecting office space and can easily add up to a \$3-6 per square foot per year reduction in operating costs.

How Can Tenants Access ClearEnd?

ClearEnd is available in dozens of buildings throughout Manhattan and New Jersey, and the service continues to expand. **Through its partnership with SL Green, ClearEnd is available in all of the SL Green portfolio properties.**

How Do Tenants Sign Up?

ClearEnd provides a no-cost review to assess the benefits for tenants at any time during the leasing process or after move-in. In addition, leasing agents can call upon CS Technology to answer questions about the building's technology and communications infrastructure. Leasing agents can coordinate the assessment or tenants can contact ClearEnd directly at 1-800-950-8000.
