What is ClearEnd?

ClearEnd is a new way for businesses to secure low cost voice and data **connectivity**, dependable ongoing **IT support** and knowledgeable infrastructure **project services** from a single source.

By combining these services in one package, ClearEnd provides a way for you to better manage your entire communications and technology infrastructure – from sourcing and installing your phone system and Internet service, to expanding your internal local area network, to backing up your data, to making sure the entire communications and technology system is as effective and

inexpensive as possible. No other provider can deliver ClearEnd's combination of service, support and savings.

Who Delivers ClearEnd Services?

The ClearEnd service is exclusively offered by CS Technology, your Building Technology Provider, in partnership with ClearEnd LLC. CS Technology is a NY-based technology strategy and implementation firm that provides services to tenants within some of Manhattan's largest buildings, as well as Fortune 500 clients such as **Bank of America, Bear Stearns, Deutsche Bank, Fannie Mae, Microsoft** and **JP Morgan**. ClearEnd LLC is an innovative connectivity and service provider that is run by experts in the provisioning of Internet and communications connectivity.

CS Technology's large client base allows them to aggregate the costs of connectivity and IT services, so that companies of all sizes benefit from the aggregated buying power of a larger organization. In addition, CS Technology's role as your Building Technology Consultant means they are on-site and available when you need them – a service unavailable anywhere else.

What Are the Savings?

ClearEnd can lower the amount you pay for your voice and data communication services today by **50%** or more, while also providing you with the same IT support and services that large organizations benefit from –

on an as-needed basis. No other service producer can offer these savings!

How Can You Lower My Voice and Data Communications Costs by 50% or More?

ClearEnd aggregates other small and medium-sized businesses and regional offices, like yourself, when it buys voice and data communications services. This enables ClearEnd to secure lower rates from telecommunications companies than you can negotiate as an individual business.

Is ClearEnd's Voice and Data Service Reliable?

ClearEnd buys the voice and data services it provides to you from various major telecommunications carriers. The only difference between ClearEnd's voice and data communications service and that of your current supplier is that yours costs more – and does not include ongoing support and technology services.

How Do I Sign Up?

Call us right now at 1-800-950-8000 and we can begin the ClearEnd Infrastructure Assessment of your voice and data budget. Provide us with information on what you are spending on your communications and technology infrastructure, along with your particular technology needs, and within one business day, we will deliver you a ClearEnd proposal.
